

## Trelligence Welcomes Archisoft Chile as Affinity Authorized Reseller

Houston, TX, USA (January 25, 2008) – Continuing the global expansion of its reseller network, Trelligence Inc., a leading provider of architectural programming and schematic design software, today announced the addition of Archisoft (Arquitectura Arte y Tecnología, Ltda) , to its authorized value-added reseller network. Based in Santiago, Chile, Archisoft provides software, training, and related services to the Architecture, Engineering, and Construction (AEC) industry.

“Archisoft represents another key step in our international distribution strategy” said Carole Kernohan, Vice President of Business Development for Trelligence. “In addition to over 20 resellers in North America, we have representation in China, Southeast Asia, Australia, and now South America,” said Kernohan.

Archisoft sells and implements technology for individuals and companies that participate in the building lifecycle, from conception and design to development, construction and management. They are an authorized reseller for ArchiCAD®, Graphisoft’s popular architectural design software, and other architectural software tools including SketchUp Pro from Google, ECOTECT from Square One and Artlantis R® from Abvent. Archisoft also offers software, training, implementation, and consulting services. For more information, see [www.archisoft.cl](http://www.archisoft.cl).

### About Trelligence:

Trelligence is a Houston-based software company focused on enhancing the early architectural design process with real-time design+analysis tools built on top of domain-specific knowledge templates. Targeted at the worldwide architectural, engineering, construction and owner/developer (AECO) market, the Trelligence Affinity™ patent-pending software integrates with existing CAD and other design tools, including ArchiCAD® and Revit® Architecture, extending the benefits of Building Information Modeling (BIM) – faster planning, less rework and better team communication – to the early design phase of complex building projects.
