

Trelligence Exhibits & Presents Affinity at AU 2010
Design+Analysis Software
Extends the Benefits of BIM to Programming & Early Design

Las Vegas, NV, USA (November 30, 2010) Trelligence, Inc., the leading provider of architectural programming and schematic design software, is pleased to return as an exhibitor and virtual class presenter at the *Autodesk University 2010 Expo* at the *Mandalay Bay Hotel* in Las Vegas. Trelligence will hold demonstrations of the latest **Trelligence Affinity™ 6.0** release throughout the expo, November 30th-December 2nd, at **booth 409**. The demonstrations will include **bi-directional integration with Revit® Architecture**, as well as *upcoming integration with IES <VE>* software for early sustainable analysis of the project program, conceptual plan, and schematic design. The **Virtual Class, *The Role of Programming and Schematic Design in the BIM Process***, presented by Trelligence President, *Larry Ciscon, Ph.D.*, will broadcast on **Tuesday, November 30th at 2:00 P.M. (PST)**. The virtual class will be recorded and available to view on the Autodesk University website following the initial broadcast.

Trelligence Affinity provides architects with a comprehensive tool to define the requirements for a building project, and track those requirements through the design process, helping to ensure that the design meets the program requirements. Many of the new features and enhancements in the latest Affinity 6.0 release were developed specifically to meet the needs and requests of Revit® Architecture users and BIM managers.

Affinity Software helps Design Teams:

- Verify that the BIM Design matches the Program with real-time *Design+Analysis*
- Efficiently manage & track complex Program Requirements
- Create Conceptual Programs using key Volume-based Drivers
- Run multiple Design Scenarios interactively in Design Charrettes
- Present Program & Design Concepts in customized Report & Graphical formats
- Capture & re-use Domain Expertise with Affinity Knowledge Templates
- Enable full project team Collaboration online, in real-time, with TeamProject®

About Trelligence

Trelligence is a Houston-based software company that develops and sells Affinity™, a unique architectural programming and schematic design software solution for the AEC industry that delivers real-time *design+analysis* tools built on top of domain-specific knowledge templates. Trelligence Affinity is available directly from Trelligence and through an expanding network of authorized resellers in North & South America, and Asia Pacific. The patent-pending software integrates with Graphisoft® ArchiCAD, Autodesk® Revit, Google® SketchUp, and other design tools to extend the benefits of BIM – faster planning, less costly rework, and enhanced collaboration – to the early design phase of complex building projects. In November 2010, Trelligence announced a partnership with IES (Integrated Environmental Solutions) which will deliver new integration for early sustainable analysis of program data, conceptual plans, and schematic designs. Trelligence has been an active **Autodesk Preferred Industry Partner** for the AEC industry since 2008. (www.trelligence.com)
