

Trelligence Closes Investment Round

Houston, TX, USA (January 25, 2010) Trelligence, Inc., the leading provider of architectural programming and schematic design software, is pleased to announce that it has successfully closed a \$2.25M investment round with private investors. *"This capital will enable us to more rapidly achieve our vision of transforming the AEC industry through more effective design analysis tools",* said **Larry Ciscon, Trelligence President**. *"Moreover, it provides the company with the ability to leverage opportunities during the current market conditions, through growth and additional R&D investment."*

Founded in 2003 by Larry Ciscon, Trelligence has been focused on enhancing the early architectural design process with **Trelligence Affinity™**, software for the worldwide architectural, engineering, construction and owner/developer (AECO) market. Affinity delivers a real-time design+analysis tool that improves process efficiencies and extends the benefits of Building Information Modeling (BIM) – faster planning, less rework, and better project team communication - to the early design stages of complex building projects.

"We are pleased to see another Rice Alliance company presenter raise significant funding despite the current environment," says **Brad Burke, managing director, of the Rice Alliance for Technology and Entrepreneurship**. *"This recent investment funding confirms that the engineering and construction industry is seeking innovative solutions like those provided by Trelligence to reduce their costs and improve their effectiveness, especially in this time of economic downturn."*

About the Rice Alliance

The mission of the Rice Alliance is to support the creation of technology-based companies and the commercialization of new technologies in the Houston community and Southwest. Since its inception in 1999, the Rice Alliance has assisted in the launch over 225 new technology companies. Rice Alliance companies have raised more than \$500 million in early stage funding. Over 600 early-stage technology companies have benefited from participation in Rice Alliance programs as either a presenter or technology showcase company. (www.alliance.rice.edu)

About Trelligence

Trelligence is based in Houston, Texas. Trelligence Affinity is available directly from Trelligence and through an expanding network of authorized resellers in North & South America, and Asia Pacific. The patent-pending software integrates with Graphisoft ArchiCAD®, Autodesk Revit®, Google SketchUp®, and other design tools. Trelligence is an Autodesk Preferred Industry Partner for the AEC industry. (www.trelligence.com)
