

## Trelligence Launches Affinity 6.0 at AIA 2010 Expo

**Miami, FL, USA (June 10, 2010)** Trelligence, Inc., the leading provider of architectural programming and schematic design software, unveiled the new Affinity 6.0 release today at the AIA 2010 Conference & Design Expo. Trelligence, a regular exhibitor at AIA, will hold demonstrations of Affinity 6.0 throughout the expo, June 10<sup>th</sup>-12<sup>th</sup>, at booth 2392 in the Software Pavilion.

Trelligence Affinity provides architects with a comprehensive tool to define the requirements for a building project, and track those requirements through the design process, helping to ensure that the design meets the program requirements.

### **New Affinity 6.0 features & capabilities include:**

#### **Enhanced Affinity Desktop**

- Updated look and feel with improved organization of menus, views, and properties
- Ability to open multiple tabular views in a single window for quick analysis and presentations
- Enhanced interface and dialogs for automation of common program & design processes

#### **New Layouts View for Conceptual Design**

- Develop conceptual designs at any user-defined level
- Create process diagrams using new overlay tools
- Plan departments, groups, units, and other space layouts that can be added to the program

#### **Expanded 2D design tools**

- 2D vertical stacking diagrams
- New visual overlays - lines, arrows, grids, shapes, and text boxes
- Additional shape editing capabilities – curved walls, rounded rectangles, dimension pop-up for precise sizing, etc.

#### **Team Project & License Key Management**

- Team Project management for dynamic work sharing / project team collaboration
- Optional project data repository for data mining and analysis
- Automated license key manager for just-in-time key check-in/check-out

“This latest release of Affinity brings increased opportunities for dispersed project teams to collaborate in a work sharing environment – a must with large or complex projects,” said Trelligence President, Larry Ciscon, Ph.D. “Affinity 6.0 also expands the designer’s tool set, providing new capabilities to customize design layouts for enhanced presentation of concepts to their clients.”

#### **About Trelligence**

Trelligence is a Houston-based software company that develops and sells Affinity™, a unique architectural programming and schematic design software solution for the AEC industry that delivers real-time *design+analysis* tools built on top of domain-specific knowledge templates. Trelligence Affinity is available directly from Trelligence and through an expanding network of authorized resellers in North & South America, and Asia Pacific. The patent-pending software integrates with Graphisoft® ArchiCAD, Autodesk® Revit, Google® SketchUp, and other design tools to extend the benefits of BIM – faster planning, less costly rework, and enhanced collaboration – to the early design phase of complex building projects. Trelligence is an Autodesk Preferred Industry Partner for the AEC industry. ([www.trelligence.com](http://www.trelligence.com))
