

Trelligence Exhibits at AIA 2012

Washington, DC, USA (May 17, 2012) - Trelligence, the leading provider of architectural programming, conceptual & schematic design, and design validation software, returns as an exhibitor to AIA 2012 today with its **Affinity 7 release**. Trelligence will provide demonstrations of Affinity 7 - including bi-directional integration with Revit® Architecture, SketchUp™ and IES VE-Gaia & VE-Navigator for LEED® - throughout the expo at **booth 1721**, May 17th – 19th.

Affinity 7 Functionality Includes:

- > Conceptual programming with volume-based drivers
- > Enhanced design & annotation tools, including curved walls
- > Equipment management & validation
- > Building, Room, & Object level SketchUp integration
- > Advanced 3D renderer
- > Comprehensive, real-time design validation analysis
- > IES <VE> integration for early sustainable analysis
- > Enhanced Revit® Architecture integration
- > New AECOSim Building Designer integration

Trelligence Affinity™ is a unique and comprehensive software solution for the worldwide AECO industry that offers a full suite of architectural programming, early design, and design-to-program validation tools. Affinity also delivers seamless interoperability with Revit® Architecture, Google SketchUp™, ArchiCAD®, IES VE-Gaia and VE-Navigator for LEED®, and Bentley® AECOSim Building Designer for an efficient and integrated project life cycle that enables real-time design-to-program validation analysis, and unprecedented early sustainability analysis starting with the program data.
