

## Trelligence Returns to Exhibit at Autodesk University 2012

**Las Vegas, NV, USA (November 27, 2012)** – Trelligence, Inc., the leading provider of architectural programming, early design, and design validation software, returns as an exhibitor to Autodesk University 2012. Trelligence will provide live demonstrations of the new Trelligence Affinity™ 7.1 release at **booth 830, November 27<sup>th</sup> – 29<sup>th</sup>** – including bi-directional integration with Revit® Architecture and SketchUp™, and introducing new beta integration with Autodesk® Vasari.

Trelligence is a long-time partner of Autodesk and a member of the Autodesk Developer Network for the bi-directional integration of Affinity with Revit Architecture software. Trelligence Affinity for Revit helps to streamline the end-to-end BIM process by providing integration that connects the programming, early design, and analysis & reporting capabilities in Affinity with the robust design tools in Revit. The integration provides designers with access to all program information and the analysis and reporting tools of Affinity within Revit software. The Trelligence Affinity for Revit app was also one of the first additions to the Autodesk Exchange Apps Store, launched earlier this year.

“Our partnership with Autodesk has been a significant benefit to our shared customers who rely heavily on the integration between Affinity and Revit for a seamless programming-through-design process,” said Larry Cison, Ph.D., Trelligence President. “The BIM integration that we deliver with Affinity for Revit and other BIM tools resolves the costly and inefficient ‘data drop’ at the hand-off between programmer and designer. Lack of software integration is a common and critical issue throughout the AEC industry - one that directly impacts profit margins by increasing costs and time spent on re-work. We continue to work closely with Autodesk to ensure that Affinity for Revit continues to evolve with the AEC industry to provide functionality that meets the needs of programmers and designers, with particular focus on efficiency and cost savings.”

### **Expo Schedule**

Tuesday, November 27 <sup>th</sup> :	7:00 PM – 10:00 PM [International Community Reception]
Wednesday, November 28 <sup>th</sup> :	11:30 AM – 2:00 PM 7:00 PM – 10:00 PM [AUGI® Annual Beer Bust]
Thursday, November 29 <sup>th</sup> :	11:30 AM – 2:00 PM

---

### **About Trelligence, Inc.**

Trelligence Affinity™ is a unique and comprehensive software solution for the worldwide AECO industry that offers a full suite of architectural programming, early design, and design-to-program validation analysis tools. Affinity also delivers seamless interoperability with Revit® Architecture, Google SketchUp™, Bentley® AECOSim Building Designer, ArchiCAD®, and IES VE-Gaia & VE-Navigator for LEED®, for an efficient and integrated project lifecycle that enables real-time design-to-program analysis and unprecedented early sustainability analysis. For more information and video demonstrations, visit [www.trelligence.com](http://www.trelligence.com).
