

Trelligence Announces Affinity Software Compatibility with Revit 2015

Houston, TX, USA (March 27, 2014) – Trelligence Affinity™ 8 software is now compatible with Revit® Architecture 2015, the newest Revit release unveiled by Autodesk this morning. Affinity functional design software, which includes architectural programming, conceptual & schematic design, design validation, and reporting tools in a single suite, integrates bi-directionally with Revit® Architecture and other BIM tools to streamline project workflows.

Trelligence is an established member of the Autodesk Developer Network. The partnership between the two companies enables Trelligence to synchronize release updates with Autodesk, providing uninterrupted service and continued compatibility for customers using the Affinity & Revit integration.

About Trelligence, Inc.

Trelligence Affinity™ is a unique BIM software solution for the worldwide AECO industry that offers a full suite of easy-to-use *functional design* tools - architectural programming, space planning, schematic design, reporting, and design validation - in a single platform. Affinity also delivers seamless interoperability with Autodesk® Revit Architecture, Trimble® SketchUp, Bentley *AECOsım Building Designer*, Graphisoft® ArchiCAD, and IES *VE-Gaia & VE-Navigator for LEED®*, for an efficient and integrated project lifecycle that enables real-time design-to-program analysis and unprecedented early sustainability analysis.
