

## **Trelligence Welcomes Initial.AEC as Affinity Authorized Reseller**

**Houston, TX, USA (March 9, 2009)** – Trelligence, Inc., a leading provider of architectural programming and schematic design software, announced the addition of Denver based Initial.AEC to its growing reseller network. As an Autodesk Authorized Reseller, Initial.AEC focuses on sales, training, and support for Autodesk products, including Revit® Architecture and related productivity tools such as Trelligence Affinity

“We are pleased to add Initial.AEC as an Affinity reseller. The company’s dedication to superior customer service combined with their experience and expertise in Building Information Modeling (BIM) makes them a perfect partner for Trelligence and a great fit for Affinity software’s functionalities, especially the bi-directional integration with Revit® Architecture.” said Dino Agrella, Director of Sales for Trelligence.

“Initial.AEC is excited about this partnership with Trelligence,” commented Scott Bailey, Partner at Initial.AEC. “A crucial part of our business is finding and providing new and innovative solutions that complement our Autodesk offerings. Trelligence Affinity is such a find, and we are confident that the ability to capture requirements early in the design process and quickly explore various concepts will contribute significantly to our goals of improving efficiency and cost savings for our clients.”

### **About Initial.AEC ([www.initialaec.com](http://www.initialaec.com))**

Initial.AEC has been serving the technology needs of the Colorado AEC market since 2001. Today, Initial.AEC is a full service AEC solution provider, integrating industry leading software, IT infrastructure, professional services, support and training. Initial.AEC’s mission is to take a personal interest in its clients’ business and implement best-of-breed blended solutions to optimize their productivity, profitability and performance to gain a competitive edge.

### **About Trelligence:**

Trelligence is a Houston-based software company focused on enhancing the early architectural design process with *real-time design+analysis tools* built on top of *domain-specific knowledge templates*. Targeted at the worldwide architectural, engineering, construction, and owner/developer (AECO) market, the **Trelligence Affinity™** patent-pending software integrates with existing CAD and other design tools, including ArchiCAD®, Revit® Architecture, and Google SketchUp®, extending the benefits of Building Information Modeling (BIM) – faster planning, less rework, and better team communication – to the early design phase of complex building projects.
