

Trelligence Announces Enhancements to Affinity

Release 5.5 includes new Space Planning, Schematic Design Functionality
and support for Revit® Architecture 2009

Boston, MA, USA (May 15, 2008) – Trelligence Inc. announced the availability of release 5.5 of Trelligence Affinity™ software for architectural programming and schematic design today at the 2008 AIA National Convention and Design Exposition. This new release includes support for Revit Architecture 2009 from Autodesk, and delivers important new functionality that continues to extend the benefits of building information modeling (BIM) to the earliest phases of complex building projects.

Key highlights of the new release of Affinity include:

- § Resource planning and programming for capacity and staffing-based project requirements
- § User-definable program views allowing for improved presentation, clarity and analysis
- § Multiple design scenarios facilitating collaboration with client and project team
- § Enhanced room and object manipulation with 'stickiness' and alignment indicators for faster design layout
- § Additional synchronization options for optimizing the bi-directional integration with Revit
- § Performance, reliability and user interface enhancements, increasing user efficiencies and improving the user experience

"I am excited about utilizing the latest version of Trelligence. Its ability to integrate with Revit is a powerful tool to validate design against program", said Alan Black, Vice President of FKP Architects, a Trelligence customer since late 2006. "The ability to go straight from program to on-screen planning is a fantastic way to interactively develop design and planning concepts with clients". FKP Architects is headquartered in Houston, Texas, and is a leading architecture firm that focuses on transforming business by design throughout the healthcare industry.

"The enhancements we have added to Release 5.5 reflect our continuing commitment to deliver a powerful yet easy-to-use product while being responsive to feedback, ideas, and suggestions from our customers," said Larry Ciscon, President of Trelligence. "We believe Affinity gives our customers a real competitive advantage in the marketplace and we will continue to focus on delivering innovative solutions for the early architectural design process."

Trelligence Press Release

Trelligence Affinity software includes Affinity, Affinity for ArchiCAD and Affinity for Revit. The new release is available free-of-charge to all existing Trelligence customers on current product subscriptions, and can be purchased directly from Trelligence or through an international network of Trelligence Authorized Resellers.

About Trelligence:

Trelligence is a Houston-based software company focused on enhancing the early architectural design process with real-time design+analysis tools built on top of domain-specific knowledge templates. Targeted at the worldwide architectural, engineering, construction and owner/developer (AECO) market, the Trelligence Affinity™ patent-pending software integrates with Graphisoft ArchiCAD®, Autodesk Revit® Architecture and other design tools, extending the benefits of Building Information Modeling (BIM) – faster planning, less rework and better team communication – to the early design phase of complex building projects. Trelligence is an Autodesk Preferred Industry Partner for the AEC industry.
