

## **Trelligence Announces Affinity 5.6.2. Update at Autodesk University and Ecobuild America Conferences**

**Houston, TX, USA (November 30, 2009)** – Trelligence, Inc. announced that it will showcase Trelligence Affinity™ 5.6.2, the latest update to Affinity *design+analysis* software, at this year's Autodesk University and Ecobuild America conferences. The Trelligence executive team will demonstrate Affinity for Revit™ bi-directional integration with Revit® Architecture 2010 at booth 829 at Autodesk University from December 1<sup>st</sup> - 3<sup>rd</sup>. Trelligence will also provide live demonstrations of Affinity software on December 9<sup>th</sup> and 10<sup>th</sup> at kiosk 146 in the AEC Interoperability Center at Ecobuild America 2009. Trelligence Affinity software provides bi-directional integration with the latest versions of Revit® Architecture, ArchiCAD®, and SketchUp® Pro.

### **Key enhancements and features in Affinity 5.6.2 include:**

#### **Ability to create more complex reports**

- Incorporate a variety of items and formats within reports (tables, images, lists, etc.)
- Create fully customized headers and footers

#### **Schematic Design**

- Enhancements to room label formatting, including content editing, wrapping, and new scaling capabilities
- Additional background image color depth control (75 to 300 dpi)

#### **Enhanced Integration Capabilities**

- Automatic generation of Affinity "families" from Revit families
- Selective synchronization of particular Revit family types and additional control over synchronization of linked project items
- 2-way integration with Google SketchUp Pro

#### **System performance and usability enhancements**

#### **About Trelligence**

Trelligence Affinity™ is a unique architectural programming and schematic design software solution for the AEC industry that delivers real-time *design+analysis* tools built on top of domain-specific knowledge templates. Affinity seamlessly integrates with existing design tools, including Revit® Architecture, ArchiCAD®, and Google® SketchUp Pro, extending the benefits of BIM - faster planning, less costly rework, and enhanced collaboration - to the early design phase of complex building projects. Trelligence is an Autodesk Preferred Industry Partner for the AEC industry. For further information and video demonstrations, visit [www.trelligence.com](http://www.trelligence.com).
