

## Trelligence Announces Support for Revit Architecture 2010

Affinity 5.6 includes support for Revit® Architecture 2010, ArchiCAD® 12, SketchUp® 7, and new integration with additional solution partners.

**San Francisco, CA, USA (April 30, 2009)** – Trelligence, Inc. announced today at AIA 2009 that Trelligence Affinity™, software for architectural programming and schematic design, now supports the latest versions of AEC design software, including Revit Architecture 2010, ArchiCAD 12, and SketchUp 7. Trelligence will be demonstrating this integration, and will introduce new interoperability with Newforma® Project Center and other AEC software solutions, further extending the benefits of BIM into the early planning and design stages of complex building projects.

*"Trelligence has allowed us to efficiently integrate our programming and space planning efforts", said Steve Clayman, Vice President of Lavallee Brensinger Architects. "The product significantly streamlines the process of developing quick, conceptual space diagrams. Its integration with Revit is also an important continuation of this process."*

Affinity 5.6 is the latest release from Trelligence; key enhancements and new features include:

- End-user report writer
- Interactive relationship modeling (bubble diagramming)
- CSS label editing
- 2D design export to vector-format files
- Support for Revit Architecture 2010 and ArchiCAD 12
- Bi-directional integration with SketchUp 7
- Support for IFC2x3 (Industry Foundation Classes release 2x3)

Trelligence Affinity software includes Affinity, Affinity for ArchiCAD, and Affinity for Revit. The 5.6 release is available free-of-charge to all existing Trelligence customers on current product subscriptions. New customers can purchase Affinity directly from Trelligence, or through an international network of Trelligence Authorized Resellers.

### About Trelligence

Trelligence, Inc. is a Houston-based software company focused on enhancing the early architectural design process with a real-time *design+analysis* tool built on top of *domain-specific knowledge templates*. Targeted at the worldwide architectural, engineering, construction, and owner/developer (AECO) market, Trelligence Affinity™ patent-pending software integrates with Graphisoft ArchiCAD®, Autodesk Revit®, Google SketchUp®, and other design tools to extend the benefits of Building Information Modeling (BIM) – faster planning, less rework, and better team communication – to the early design phase of complex building projects. Trelligence is an Autodesk Preferred Industry Partner for the AEC industry.
