

**BNIM**

### **About BNIM**

BNIM is a multidisciplinary architecture and design firm founded in 1970 in Kansas City, Missouri. Throughout its history, the firm has remained committed to its local and regional communities while establishing a national presence as an innovator of design methodologies, sustainability and new technologies in architecture, planning and workplace design. As pioneers in the sustainable movement, BNIM and its associates have become known as thought leaders in the industry and beyond. BNIM's passion for sustainability has emerged on the national scene over the past two decades through early involvement in the U.S. Green Building Council and other national committees and demonstration projects. Their work helped define the national American Institute of Architects' Committee on the Environment, the USGBC's the USGBC's Leadership in Energy and Environmental Design (LEED®) Green Building Rating System and the Living Building concept. Through research and investigation, the use of cutting-edge technology and the execution of solution-driven design, BNIM has gained a reputation for design excellence. BNIM's projects, which include building and workplace design, urban planning and community redevelopment, have won numerous design awards from the AIA and other respected organizations. Included among them are national AIA/COTE Top Ten Green Projects Awards and recognition from the General Services Administration, the American Planning Association, and the International Interior Design Association, to name a few.
